

For our office in Brussels we are looking for a:

Science Journalist / Communicator (m/f/d), part-time (40-60%)

Your duties will include co-developing and implementing communication strategies for European-wide innovation projects relating to renewable energies, the circular economy and sustainability. This includes public relations, social media and the management of editorial content, such as articles, info-graphics and videos. Your duties will also include activities in science communication training and networking with stakeholders.

You should have a scientific degree or a similar qualification, a minimum 2 years journalism/science communication experience and be fluent in English. Knowledge of other European languages and experience of working in an intercultural environment would be assets.

For this position, you should be dynamic, self-confident and team-oriented with a collaborative approach. You should also enjoy communicating and networking with a range of different people.

We offer an interesting position with a wide range of tasks in a friendly multi-national team. You will be given a high level of freedom in how you fulfil your tasks and will experience little hierarchy.

For this position you need to have a freelance status in Belgium.

The job is currently offered as a part-time position for 2-3 days/week but may extend to a full-time position within the upcoming 6 - 12 months.

Please send your application with remuneration expectations by November 18th 2020 to:

European Science Communication Institute (ESCI) gGmbH
