

The European Science Communication Institute (ESCI) is a non-profit organisation fostering communication between science and society. We plan and implement communication strategies for international research projects, assist scientists in reaching out to citizens, and develop communication tools aimed at different target groups.

For our office in Oldenburg, Germany we are looking for a:

Business Consultant on Smart Grids (m/f/d)

30-40h week

Your role will be to develop exploitation strategies for European-wide innovation projects relating to smart grids and renewable energies. This will include market research in various European countries and the development of business models taking into account the legal, technological, financial and social barriers.

You should have a background in business and a thorough understanding of grid and similar technologies, a proven track record for developing exploitation strategies, be familiar with European research /innovation projects and have good knowledge of different market levels. You are fluent in spoken and written English.

For this position, you should be dynamic, self-confident and team-oriented with a collaborative approach. You should also enjoy communicating and networking with a range of different people.

Our office is located in Oldenburg (Oldb), a family- and bicycle-friendly city in North-West Germany. Two universities and several international research institutes give Oldenburg its multi-cultural atmosphere. The office is located centrally, within easy reach by bike or public transport. We offer an interesting position with a wide range of tasks in a friendly multi-national team. You will be given a high level of freedom in how you fulfil your tasks and will experience little hierarchy.

Please send your application with salary expectations by **June 6th 2022** to:

European Science Communication Institute (ESCI) gGmbH
